

# RISHABH PRAJAPATI

## Full Stack Developer | 3 Years Experience

Borivali West, Mumbai | +91 9137146412 | rishabhprajapati150@gmail.com | [Naukri](#) | [Indeed](#)

### PROFESSIONAL SUMMARY

Full Stack Developer with 3 years of experience designing and delivering scalable web applications across EdTech and Analytics domains. Proficient in React.js, Next.js, Node.js, Express.js, MongoDB, and TypeScript. Experienced in AI API integration (Grok), Role-Based Access Control, map-based visualisation, and end-to-end Apache Server deployment and production management.

### WORK EXPERIENCE

#### Full Stack Developer · Kanalytics *Dec 2025 – Present*

**Stack:** Next.js, React.js, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB, Apache Server

##### ► KAnalyser – AI-Powered News Analysis Platform

- Currently responsible for the KAnalyser project, handling ongoing development, maintenance, and production support
- Worked on a platform where users can interact with news using AI-based chat (core chat API developed by team members)
- Developed Notification system to provide real-time alerts to users
- Built Daily News Update feature to automatically send curated news content to users
- Implemented Flash Search functionality to filter news by source (Print, Web, TV)
- Integrated Grok API to allow users to ask general AI-based questions beyond selected news
- Designed and developed Admin Panel independently:
  - Created user management system – add users, assign roles and permissions
  - Implemented RBAC with dynamic UI visibility (tabs/buttons shown based on user role)
- Managed application deployment and production environment using Apache Server

##### ► Risk Management System

- Collaborated with the team to build an enterprise risk analysis platform
- Developed Command Center module with interactive map-based visualisation using location markers
- Implemented event tracking and geographical risk scoring based on location data
- Built Event Intelligence module: filter events by category, compare multiple events, and merge events for deeper insights
- Worked on India map portfolio risk analysis covering education loans and Bajaj Finance loan segments
- Deployed application to production using Apache Server

#### Full Stack Developer · Edulab Educational Exchange *April 2023 – Nov 2025*

**Stack:** React.js, Next.js, Tailwind CSS, Node.js, Express.js, MongoDB, MySQL

##### ► University Fee Management System

- Developed a platform to automate fee payments, track transactions, and simplify student billing
- Enabled students to view and pay fees online; provided admins with tools to manage fees and generate detailed reports

Live: <https://hsncu.instafeeze.in/>

##### ► Hostel Management System

- Developed system for room allocation, fee management, and student attendance tracking
- Implemented Role-Based Access Control (RBAC) for separate, secure student and admin dashboards

Live: <https://pahsuhostel.studentscenter.in/>

##### ► Financial Budgeting Module

- Designed and built a budget module for setting budgets, tracking expenses, and generating financial reports
- Provided financial planning tools to help institutions monitor spend and improve budgeting efficiency
